school arcade, hard, very hard, super punishing space shooter. The game is not easy and you will die a lot. Please take caution, if you're in the mood for something that will hold your hand or let you win, you're in the wrong place. Star Drifter is ideal for casual gamers that enjoy a real challenge. Prepare to be destroyed over and over again, lose your score and rage at the computer.

Thank you and good luck!

XD .. So scary.. Hate the Jumpscare :<. 1c is a shady company that publishes games then abandons them. Inquiries go unanswered and bugs go unpatched. I will be avoiding this publisher in the future.. its good, but on my computer it crashes so could i have my money pack?. Okay, so maybe I was expecting something different, but in my opinion this is too much "art" and not enough "game".. I have just started to play and i already love it.

The graphics, the music, it's all made really nicely.

Similar in idea to other game i love Super Hexagon, it goes beyond the static gameplay and make it moving.

It could use some more hardcore settings (ie. difficulty levels, no preview mode, random mode etc).

Overall it's a really fun game I recommend to my gamer friends.

Fantastic game, a great way to finish the trilogy. I definitely recommend to buy this one, it's a great experience for a really low price.. Older version of VX ACE. Make games for weeboos like my friend Anders. More fun than Game Dev Tycoon! Definitely recommend. Great retro looking shmup, with a modern vibe. Easy to learn, hard to master and very satisfying to play. Recommended!. Best game to buy for 0.13\$ on sale. It tells russian life so damn well! but most of all, voice and sound system is epic!
